(Alex: It was a fun game. I'm sure it is important to take the context into account. I played a pure reversed King's Indian, but not everyone responds to the King's Indian attack in that way. The way I played gives Black a very fast queenside attack that mirrors White's plan in the main lines of the King's Indian, and in that situation it is probably (Text cont. next col.)
(Cont. from prev. col.) best to keep the Knight on the queenside, possibly playing a4 followed by $\mathrm{Na3}$. From there it can go to c4 where it puts pressure on Black's e5 pawn in combination with the Knight on f3, and the pawn on a4 makes it more difficult for Black to dislodge the Knight from c4 by playing b5.) ## Game from the NPCC 2019 G90 March-April Swiss Tournament: <br> Round: 5

Submitted by Terance with his comments (as edited) and selected Fritz]*Stockfish comments [shown thusly].
*(Please copy and paste the HTML link at the end of this article into your browser to read the complete Stockfish comments.)
White: Terance Hall (1855) Black: Alexander MacFarlane (1859)

Date: 4/5/2019
[A65: M odern Benoni: 6 e4] (Terance: In the M odern Benoni opening Black tries to use the e5 square as a launching pad for an attack so don't be afraid to trade a Bishop for a Knight on that square.) 1.d4 Nf6 2.c4 e6
3. Nc3 c5 [D]

(Terance: A Boloney, I mean Benoni from Alex, I was booked up on the other openings that we play but I was happy to play against this as it has been awhile; however, I am very familiar with the lines and strategy.]
4.d5 exd5 5.cxd5 d6 6.e4 g6 7.Bg5 [D] (Next col.) (Text cont. next col.)
(Position after 7.Bg5 (From prev. col.)

(Cont. from prev. col.) (Terance: Normally the Knight is played to f3, but I wanted to see how Alex would respond to this move.) [*Stockfish: 7.Nf3 Bg7 8.Be2 0-0 9.Nd2 Re8 10.0-0 Nbd7, etc...] 7...h6 8. Bf4 (Terance: Played, as the plan is to play e5 when I get a chance.) 8...Nh5?! [D]

(Terance: The Knight pushed the Bishop back but loses time as it has to go back to $f 6$ which means White developed the Bishop for free.) 9. Be3N (Terance: Strongest!) 9...Bg7 10.Be2 Nf6 11.Qd2 [*Stockfish: 11.Nf3 Bg4 12.0-0 0-0 13.Nd2 Bxe2 14.Qxe2 Re8, etc...] 11...Qe7 [D]

(Terance: Good active move to maintain pressure on e4.) 12.Bd3?! (Terance: Better was f 3 , I was reluctant to move this pawn because It blocked my Knight's key square. I was planning a possiblef4 (Text cont. p.4)
(Cont. from p.3) at the right time.) [12.f3 a6+=(*Stockfish: 12...0-0 13.h4 h5 14.Bh6 Qe5 15.a3 a6 16.a4 Qd4, etc...] 12...Ng4= (Terance: Played to go to the e5 staging area.) 13.Bf4 Ne5?! [D]

(Terance: Best was Nd7 to try to finish developing.) [*Stockfish: 13...Nd7 14.Bg3 0-0 15.Nf3 f5 16.0-0 Nde5 17.exf5 Nxf3t, etc...] 14.Nge2 (Terance: The Black Knight is very strong on the e5 square, so Bxe5 would give White a nice advantage. I played $\mathrm{Nge2}$ to develop and see what other options I would have.) [*Stockfish: 14.Bxe5 Qxe5 15.f4 Qe7 16.Nf3 Bg4 17.00 Nd7, etc...] 14...a6 [Prevents intrusion on b5] 15.a4 [*Stockfish: 15.Bxe5 Qxe5 16.f4 Qf6 17.0-0 0-0 18.Kh1 Nd7, etc...] 15...Nxd3+16.Qxd3 [Black has the pair of bishops] 16...0-0 [Black has a cramped position] [16...Nd7 17.0-0=]
17.0-0 [D]

(Terance: White is completely developed and Black still has two pieces to develop. Black does have a slight compensation advantage due to his two Bishops.)
[17.Qg3 Rd8=(*Stockfish: 17...Be5 18.Bxe5 Qxe5 19.Qxe5 dxe5 20.h4 Nd7 21.a5 Nf6, etc...] 17...Nd7 18.Qd2 (Terance: Trying to provoke some weakness.) [*Stockfish: 18.Bg3 Ne5 19.Bxe5 Qxe5 20.f4 Qf6 21.Kh1 Bd7 22.Ng3 Qd4, etc...] 18...g5 19.Bg3 f5?! [D] (Next col.) (Terance: This move sort of surprised me but then again it is Alex's style to play this way. He is not afraid to pose certain challenges (Text cont. next col.)
(Position after 19...f5?! (From prev. col.)

(Cont. from prev. col.) in the position. It seems like Black is trying to open his slightly cramped position so his pieces, especially his Bishops, to become more active. I did welcome this, as my position seems solid and my King is safer than Black's King at the moment.) [19...c4!?=*Stockfish: 20.Nd4 Nc5 21.a5 Nxe4 22.Qe3 f5 23.Nxf5 Bxf5 24.f3 Bxc3, etc...] 20.exf5 Ne5?! [20...Nb6!?=*Stockfish: 21.Qe3 Qxe3 22.fxe3 Rxf5 23.Bxd6 Nxd5 24.Rxf5 Nxc3 25.Rxc5 Ne4, etc...] 21.Bxe5!+- [D]

(Terance: This is the only move I could see to solidify my position. The Knight on e5 was too strong and had to be taken off and I saw that I can play g4 holding on to my extra pawn while shutting down Black's White squared Bishop.) 21...Bxe5 (Terance: Qxe5 seems slightly better according to Stockfish.) [Stockfish: 21...Qxe5 22.g4 Bd7 23.a5 Rab8 24.Rfe1 b5 25.axb6 Rxb6 26.Ng3 Qf4, etc...] $22 . \mathbf{g}^{[D]}$

(Text cont. next col.)
(Cont. from prev. col.) (Terance: All part of the plan to restrict Black.) 22...h5 23.h3 [Stockfish: 23.f3 hxg4 24.fxg4 Qh7 25.Rf2 Bxf5 26.gxf5 Rxf5 27.Rg2 Kh8, etc...] 23...hxg4
24.hxg4 Bxf5? [D]

(Terance: Black sacs for some freedom and hopefully some attack.) [Better is $24 \ldots$...h7 and Black is still in the game 25.Ng3 Qh3] a) *Stockfish: 25...Bf4 26.Qd3 Qh3 27.Rfel Bd7, etc...] b) $25 . . . Q h 426 . Q e 2$ Qh3 27.Nce4 Bf4 28.b4 c4 29.Rfc1 Bd7, etc...] 25.gxf5+- Rxf5 26.Ng3 [D]

(Terance: I spent some time on this move as it is the most critical in the game. Black wants to bring the Queen to the h-file and Rooks on the f-file for an attack. If White can neutralize this he will win with his extra material. So I kept going back and forth between Kg 2 and Ng 3 , either one was fine. I choose Ng 3 as it also posed a threat.) 26...Qh7 [26...Rf4 27.Rael+] 27.Kg2 Raf8 [27...Rf4 28.Rael+] 28.Nce4 [D] (p.5)
(Terance: I spent some time on Nxf5 figuring that this was playable to win but with some checks to navigate so I choose a more solid approach with Nce4.) [28.Nxf5 makes it even easier for White 28...Qh2+29.Kf3 Qh5+ 30.Ke4 Qg6+] 28...Bf4 (Terance: I missed this simple move but it didn't change anything.) (Text cont. p.5)
(Position after 28.Nce4 (From p.4)

(Cont. from p.4) [28...Qh4 29.Ra3 Bxg3 30.Nxg3+] 29.Qc3 [D]

(Terance: I was trying to improve my position and at the same time pose some threats, avoiding them of my opponent. Qd3 was playable but if Black takes on g3, White must take back with the Queen, if not he loses the Queen, i.e. if Nxg 3 Rxf2 + ! Rxf2 Qxd3! The pawn on d5 is a distraction and should not be taken immediately.) 29...Rxd5?! (Terance: For a minute I thought I missed something but this just quickens the end for Black.)
[29...Re5 30.Nxd6 Qg6 31.Nxb7 Bxg3 32.Qxg3 Rxd5+-] 30.Nf6+[D]

(Terance: This forces everything.)
30...Rxf6 31.Qxf6 Bxg3 32.Qd8+ [D] (Next col.) (Terance: fxg3 wins but Qd8 is simple as White can check the King again and trade Queens, take back on g3 and win with the extra Rook. Black resigns!) (Text cont. next col.)
(Position after 32.Qd8+ (From prev. col.)

(Cont. from prev. col.) [32.Qd8+ Kg7 33.Qc7+Kh6 34.Qxh7+Kxh7 35.fxg3+;* Stockfish: 32.fxg3 Rd2+ 33.Rf2 Rxf2+34.Qxf2 Qe4+35.Kh2 Qd4, etc...] 1-0
