This issue features Joe Mucerino's Games from the 121st U.S. Open. The purpose of these newsletters is to include as many games as possible by NPCC players irregardless of the strength of the participants. Thanks to all for submitting games!

Joe wrote:

"This year's U.S. Open, held in Cherry Hill, NJ, was a tremendous success, with 515 players taking part in the main tournament (350-400 is the norm), and many more also playing in side events. It was the largest U.S. Open since 2013 in Middleton, WI, which only attracted four more players than this one. Nearly every state was represented, and, no surprise, Pennsylvania was behind only host state New Jersey in participation.

One very popular side event was the Weekend Swiss, with 109 players taking part in this five round, G/60 d5 event."

(Joe - It was better to play 17...f5 now, anticipating 18.Qc2, because if 17...f5 now, then after 18.exf6, Black can play 18...Qxd6, which he would not be able to do with a Queen on c2 threatening mate.) 18...g6 (Joe - 18...f5 is equally as strong.) (Text cont. next col.)

[B01: Scandinavian Defense] (Joe - 17-year-old Shah was 4-0 going into this, the final round. After board-1 ended in a hard-fought draw, he could have won the tournament outright with a win.) **1.e4 d5 2.exd5 Nf6 3.d4 Bg4 4.Nf3 Qxd5 5.Be2 e6 6.c4** [6.Bf4 c6 7.Nbd2 Be7 8.h3 Bh5 9.c4 Qd8 10.Qb3 Qc8 11.0-0 0-0 12.Rfe1 Rd8, etc... (Cont. from p.2) 17.Rde1 Qa2 and the Rook continually harasses the Queen. I wasn't looking for a draw, and I doubt White was either.) [Black should play 13...Bxf3= 14.Nxf3 Ng4] **14.Bd3 Qh5 15.h3** [Initiative] [White is more active.] **15...Bxh3 16.gxh3 Qxh3 17.Nh2 Qh4** [D]

(Joe - The computer found the clever 17...Qxe3 18.fxe3 Nxd4! and White loses a piece if there is a trade on d4.) [17...Qxe3+= 18.fxe3 Nxd4] **18.Ndf3+- Qh3 19.Rfd1** (Joe - In similar lines, Black wins the Pawn on d4, but that's not going to happen now. Black is in trouble.) **19...Ng4** [D]

[19...h6+- is a better defense. 20.Bc2 Rac8] **20.Nxg4! Qxg4+ 21.Kf1 Kf8 22.Qe4 Qh3+ 23.Ke2?! [D]**

(Joe - 23.Ke1 was a bit better, because, as we will see, I get a pin in later.) [Threatens to win with Rh1.] **23...f5 24.Qe3** [Strongly threatening Rh1.] **24...Qg4 25.Bc2?! [D]** (Joe - Breaking the pin was better.) **25...e5** (Joe - After the game, Shah told me that he

(Cont. from prev. col.) missed this move. White is still winning, though.) **26.dxe5 Nxe5** [D]

27.Bxf5! Qxc4+ 28.Bd3?? (Joe - The computer evaluation went from about +2 to -1.6 on this one move. Again, White's King needed to get out of Dodge with 28.Ke1.) [28.Ke1+- and all is fine. 28...Nxf3+ 29.Qxf3] **28...Nxd3+- 29.Rxd3** [D]

[Ne5 is the strong threat.] **29...Re8** [Inferior is 29...Rxd3 30.Qxd3 Re8+ 31.Kd2+-] **30.Ne5** [D]

30...Rxe5 31.Qxe5 Re8 32.Qxe8+ Kxe8 [Endgame KQ-KRR] **33.Rad1** (Joe - White has two Rooks for the Queen, but Black has two extra Pawns, and the h-Pawn is an outside passed Pawn, which will decide the game.) **33...h5 34.Ke1 Kf7** (Joe - I did not want to allow 35.Rd7 and have my King trapped on the back rank.) **35.Rf3+ Kg6 36.Rdd3 h4** [D] (Next col.) Position after 36...h4 (From prev. col.)

(Cont. from prev. col.) (Joe - Notice the Pawn prevents Rg3+.) **37.Rc3 Qd4 38.Rfd3 Qe5+ 39.Re3 Qh2** (Joe - Also notice that the Queen defends c7.) **40.Rc4** [Better is 40.Ke2] **40...Kh5 41.Re7 c6** (Joe - This move is not strictly necessary in this position. Black wants to prevent White from coordinating his Rooks. But after 41...h3 42.Rxc7 Qxc7! 43.Rxc7 h2 44.Rxg7 Black queens with check. With time running down, I did not want to take any chances.) (Joe - Also note that after the text move White cannot capture on g7 because of 42...Qe5+.) **42.Rc5+** [Better is 42.Ke2] **42...g5 43.Rxb7?** [D]

(Joe - This wastes time and does not coordinate the Rooks.) [Better is 43.Ke2 Qg2 44.Rc3] **43...Qg1+ 44.Ke2 Qg4+ 45.Ke1?** [45.f3 Qe6+ 46.Kf2 Qa2+ 47.Kf1 Qxa3 48.Kf2 Qa2+ 49.Kf1] **45...Qe4+** [Black is clearly winning.] **46.Kd2 h3** [And now ...h2 would win.] **47.f3 Qxf3 48.Rh7+ Kg6** [D] (p.4)

Game from the 2021 - 121st U.S. Open Tournament

Round: 1

White: Maxwell Yang (FL) (1741) (Age 9)

Black: Joseph Mucerino (PA) (2150)

[D48: Semi-Slav: Meran System: 7...b5 8 Bd3 a6] (Joe - I entered the 6-day schedule, which had the same slow 40/80 SD/30 +30 second time control as the 9-day schedule but played two games a day on three days. The four-day schedule played six G/60 d/5 games. My tournament started out with a blunder. My opponent and I played with the wrong colors! To make a long story short, the section was repaired, and that led to some confusion. Yang did not notice it either. He represented Florida in the 2nd Annual Rockefeller National Tournament of Elementary School Champions. He is also ranked 12th in the country for all 9-year-olds.) **1.Nf3 d5 2.c4 e6 3.d4 c6 4.Nc3 Nf6 5.e3 Nbd7 6.Bd3 [D]**

6...dxc4 7.Bxc4 b5 8.Bd3 a6 9.a3 c5 (Joe - If Black had allowed 10.b4, his Queenside would be cramped forever.) **10.dxc5 Nxc5 11.Bc2N [D]** (Next col.) (Joe - Here I had a think. I want to avoid the exchange of Queens, because I think that makes winning difficult for Black. But if I make a move like 11...Qb6, White will play 12.b4 and I will have to make an undesirable move with my Knight. After thinking a bit, (Text cont. next col.)

Position after 11.Bc2N (From prev. col.)

(Cont. from prev. col.) I played what I thought was the best move in the position, even if it did allow the exchange of Queens. By the way, the computer says I should exchange Queens with 11...Qxd1+.) [11.Be2 Bb7 12.0-0 Qxd1 13.Rxd1 Nb3 14.Rb1 b4 15.axb4 Bxb4 16.Nd4 Nxd4, etc... Cerveny,M (2320)-Petr,M (2452) Litomysl 2009 0-1 (48)] **11...Bb7 [Black is slightly better.] 12.b4 Nce4** (Joe - Because of 11...Bb7, my Knight can now go to a good square.) **13.Nxe4 [D]**

[Hoping for Qxd8+.] **13...Nxe4 14.Bb2** (Joe - Here we go again. I still do not want to trade Queens, but if I play 14...Qb6, White has 15.Bd4, or if 14...Qc7 White can play 15.Rc1. So, I thought about developing my dark squared Bishop. If I try to avoid Queens with 14...Bd6, 15.Qd4 hits the Knight and g7 and will probably be followed by Rd1. So, what about 14...Be7? Well, if 15.Bxg7 Rg8 I thought the Rook may become trapped if 16.Be5 Rxc2 17.Bg3 happened. If 17...Nxc3 18.hxg3 Qxd1 19.Bxd1 holds the Knight on f3. But wait! At the board, I missed in my analysis that after 17.Bg3 Black has the simple winning move 17...Nc3.) **4...Qxd1+** (Joe - Why did I decide to trade Queens? Because now, in all likelihood, White will play...) **15.Rxd1** (Joe - ...and now the Knight on f3 will not be protected by (Text cont. next col.)

(Cont. from prev. col.) the light squared Bishop. First, I threw in...)

15...Rc8 (Joe - ...because White cannot protect the Bishop with 16.Rd2.)

16.Bb3 Bd6 (Joe - Now that White's light squared Bishop is not Attacking the Knight, I can safely play my Bishop here without fear of a removal of the guard tactic with 17.Bxe4 Bxe4 18.Rxd6. Putting my Bishop on d6 allows my King to stay in the center with ...Ke7. There is no need to castle because Black's King will not come under attack, especially with the Queens off the board.)

17.Nd2 [Of course not 17.Bxg7 Rg8-+]

17...Ke7 18.0-0? (Joe - White should have exchanged. Now White's position begins to head south.) [18.Nxe4= remains equal. 18...Bxe4 19.0-0 (19.Bxg7? Rhg8-+)] **18...Nc3-+ [D]**

(Joe - White's Rook is attacked, and b1 and c1 ((because of ...Ne2+)) are not safe squares, leaving only a1 and e1. If White moves his Rook to one of those squares, then Black has an advantage after 19...Be5.) **19.Bxc3 [Better is 19.Rde1] 19...Rxc3** (Joe - The computer preferred a Rook move instead.) **20.Rc1 Rxc8 21.Rxc3 Rxc3 22.Rb1 Bd5** (Joe - This was a difficult decision, and perhaps not the best one. Normally, when you have the bishop pair, you want to keep it. I wanted to try to find a way to attack the Pawn on a3. The computer said that throwing all of the kingside Pawns down the board was the best option.) [22...f5-+ 23.h3 g5] **23.Bxd5 exd5 [Endgame KRB-KRN] 24.Rb3?** (Joe - This was played very quickly and loses a Pawn.) **24...Rc1+ 25.Nf1 [D] (p.5) 25...Bxh2+! 26.Kxh2 [Aiming for Nd2.] 26...Rxf1 [KR-KR] 27.Kg3 Rc1** (Joe - Simply Taking control of the only open file.) **28.Rd3 Ke6 29.a4? [29.f4-+] 29...Rc4-+ [D] (p.5)** (Joe - Now White's Rook will become passive (Text cont. p.5)

Position after 25.Nf1 (From p.4)

Position after 29...Rc4+ (From p.4)

(Cont. from p.4) because nothing else is guarding the Pawn on b4.) [Resist 29...bxa4 30.Ra3+] 30.axb5 axb5 31.Rd4?? (Joe - As Inspector Gadget says, "Wowzers!" White trades into a pure King and Pawn ending a Pawn down, which is virtually winning in all cases unless Black had doubled Pawns.) [31.Rb3] 31...Rxd4 32.exd4 [KP-KP] 32...Kf5 (Joe - Improving the King's position, which is always important in endings.) 33.Kf3 h5 (Joe - Preventing 34.g4+, pushing Black's King back, and also trying to establish an outside passed Pawn.) 34.Ke3 g5 35.Kf3 g4+ 36.Ke3 h4 [D]

[E01: Catalan: Early deviations]

(Joe - With a +3 score, I got paired up. This game was played on board 12, which was separated from the main body of players.

Matviishen is a two-time European U12 Champion, which he won in 2013 and 2014.) (Joe - This game took the longest to play, at 5 hours and 20 minutes.)
